

EBBESOFT CH CONC.

Hydrophilic Conc. Ester Quartz Softener

Chemical Nature

Blend of hydrophilic ester quarts & Silicones

Ionic Nature

Cationic

pH

4-5

Physical Appearance

Slight Yellow Liquid

Solubility

Soluble in water

Fabric Type

Knitted and Woven fabrics of all kinds

Storage

12 months, 25-35 °C.

Health & Safety

SDS available upon request

Product Feature

- **EBBESOFT CH CONC** gives a very good hydrophilic character to the fabric.
- **EBBESOFT CH CONC** gives very smooth and voluminous handle on all kind of cellulosic fibers or its blend with synthetics.
- **EBBESOFT CH CONC** is specially developed for the Towels and gives a fat handle.
- **EBBESOFT CH CONC** increases the resilience of fabric.
- **EBBESOFT CH CONC** considerably improves the handle in the case of "Open End "thread articles.
- **EBBESOFT CH CONC** decreases the tendency to crease.
- It is ecological and biodegradable Product.

Application

- **Dilution Recipe**
 - Dilute at 40 °C as recommended below
 - Water 78%
 - Acetic Acid 1%
 - EBBESOFT LC CONC. 20%
 - NaCl 1%
- **Exhaustion Process:**
 - 2-4 % EBBESOFT CH CONC, pH 4.5-5.5
 - 20 minutes at 40°C
- **By Pad Application:**
 - 20-40 g/l EBBESOFT CH CONC, Pick up: 75-85%
 - Dry at 120 °C-130 °C
