

EBBESTAT ANS

Anti-static Agent

Chemical Nature

Modified Polyester and Polyether

Ionic Nature

Non-Ionic

pH

5.-7

Physical Appearance

Translucent White Liquid

Solubility

Soluble in water

Fabric Type

Cotton and Polyester

Storage

12 months, 25-35 °C.

Health & Safety

SDS available upon request

Product Feature

- Rapidly reduces static build-up on synthetic and natural fibers.
- Provides prolonged anti-static effects through multiple washes and wears.
- Minimizes garment cling and electrostatic discharge during wear.
- Does not cause yellowing or discoloration of fabrics over time.
- Suitable for use with a wide range of textiles including polyester, nylon, acrylic, wool, and cotton.
- Slightly enhances the softness and smoothness of the fabric.
- Free from harmful chemicals, safe for both users and the environment.

Application

- The recommended dosage of EBBESTAT ANS is as follows
- **Exhaustion Process:**
 - 1 to 3% owf
- **Padding Process:**
 - 10 to 30 g/l
