

DESTOSTAB

Peroxide Stabilizer

Chemical Nature

Phosphonate derivatives

Ionic Nature

Anionic

pH
11-12

Physical Appearance

Transparent Liquid

Solubility

Soluble in water

Storage

12 months, 25-35 °C.

Health & Safety

SDS available upon request

Product Feature

- Protects fabric integrity by preventing excessive oxidative damage during bleaching.
- Enhances the stability of hydrogen peroxide during the bleaching process, ensuring consistent performance.
- Improves the whiteness and brightness of bleached fabrics by ensuring effective peroxide action.
- Environmental-friendly formulation, free from harmful heavy metals and phosphates.
- Reduces the need for additional stabilizing agents, simplifying the bleaching process.

Application

- **H₂O₂ Bleaching (Exhaust Process)**
DESTOSTAB 0.5 – 1.5 g/l
- **Pad-Steam Bleaching**
DESTOSTAB 4 – 6 g/l
- **Pad-Batch Bleaching**
DESTOSTAB 5 – 7 g/l
