

ECOSOFT SC

Main Description:

Softener for Printing Paste.

Chemical Structure:

Silicones.

Technical Specification:

Appearance at 20-25°C

Clear liquid

Properties:

- High softening power.
- Improves the rubbing and washing fastnesses.
- Reduces the toughness and tack of the printing paste.

Application:

It is added directly to the printing formulation from 2 to 5% depending upon the final requirement of the product.

Storage:

The product is stable for 12 months, whenever kept in the original containers, well-closed and protected from weather inclemencies at a maximum temperature of 35 °C.

Information concerning the safety regulations can be taken from the Material Safety Data Sheet of this product. We reserve the right to modify the product and technical leaflet. Our department for applied technique is always at your service for further information and advice. Our technical advice and recommendations given verbally, in writing or by trials are believed to be correct. They are neither binding with regard to possible rights of third parties nor do they exempt you from your task of examining the suitability of our products for the intended use. We cannot accept any responsibility for application and processing methods which are beyond our control.
